- Target: Compare some Java and C# key differences, usually unknown by some developers from each side...
- Feel free to join all of our discussions. We consider you as a Speaker as well! Your knowledge is REQUIRED! 😊
- We are not talking about tools and frameworks. (No Visual Studio vs. Eclipse/IntelliJ, Spring*,...)
- Each language offers a WAY to solve problems, BUT with different approaches (sometimes good, sometimes NOT...)

Shaping the future of digital business
